**DETAILED ACTION**  
***Information Disclosure Statement***

The information disclosure statement is not considered because no copy was provided.

***Drawings***

The examiner approves the drawings filed 19 November 2003.

***Allowable Subject Matter***

Claims 1-4 are allowable.

As to claims 1 and 3, the prior art of record, taken alone or in combination, fails to disclose or render obvious measuring light intensities at a plurality of locations in a laser beam emitted by a semiconductor laser and applying their measurement results to a student's/t distribution function to calculate the light intensity distribution. Additionally, the prior art of record, taken alone or in combination, fails to disclose or render obvious a light intensity detecting means that measures light intensities at a plurality of locations in a laser beam emitted by a semiconductor laser and data processing means for calculating the light intensity distribution by applying the measurement results obtained by said light intensity detecting means to a student's/t distribution function to provides the results closer to the actual measurement values than Gaussian distribution does. Claims 2 and 4 are allowable by virtue of their dependency.

***Conclusion***
